## Borescope Can Record Two Hours of Video

Designed for those who need enhanced digital video and image storage, the VideoProbe® XL PRO Plus video borescope features the ability to record and play back more than two hours of DVD format MPEG2 video. The system accepts any storage capacity size Type I CompactFlash® (CF) card. It can record digital still images and MPEG2 or MPEG1 video either on its internal 32-MB flash memory or on the removable CF cards. The ergonomic hand-piece provides a high-resolution, color LCD screen and allows one-handed operation of the joystick. The system is available in all XL PRO probe diameters — 3.9, 5.0, 6.1., 7.3, and 8.4 mm.

## Literature Details Handheld Weld Inspection System

A 2-page datasheet describes the company's WISC handheld joint and weld inspection system that uses digital laser sensor technology to measure geometric features of weld and joint contours. The operator aims the sensor at a weld or joint and, after activation, quickly obtains measurements to validate the weld geometry based on preset thresholds. Results and system information are displayed on an integrated PALM™ handheld organizer with full-color screen.

## Machine Offers Precise, High-Quality Sample Cutting

The MSX-A1 Series sectioning machines offer automated pulse section to produce high-quality samples. Each machine features an advanced spindle design, an easy-to-operate LCD touch-screen control panel, and large T-slotted tables for easy sample maneuvering. The MSX200-A1 is designed for sectioning small critical parts. It features a 1.5-hp motor and an 8-in. blade capacity for longitudinal sections. The MSX250-A1 is used for medium-sized sectioning in automotive applications, ceramics, and composites. It comes equipped with a 5-hp motor and up to 12-in. blade capacity.

The MSX300-A1 features a 14-in. blade capacity, 5.6-in. LCD display, 9-kW motor, and an integrated Y table.

## NDE Catalog Available in Five Languages

Magnetic Analysis Corp., a manufacturer of nondestructive examination equipment for tube, bar, wire, and metal products, has made its 2004 product line catalog available in five languages. Chinese, French, German, and Spanish versions of the catalog can be down-

loaded in A4-sized PDF format from the company's Web site, [www.mac-ndt.com](http://www.mac-ndt.com). To receive a free printed copy of the English version, call (800) 463-8622 or (914) 699-9450, or request via e-mail at [info@mac-ndt.com](mailto:info@mac-ndt.com).

## Flexible Borescopes Deliver Large, Clear Images

The new line of Hawkeye® Blue flexible borescopes includes 2.5-, 4.0-, and 6.0-mm diameters. They feature high-clarity fiber-optic bundles that deliver superior resolution, up to 25,000 pixels, and excellent contrast. Features include two-way articulation ( $\pm 120$  deg), stainless steel braided sheaths, and a 30 $\times$  eyepiece.
