

AWS Errata Sheet

AWS Standard: AWS BRH:2007, *Brazing Handbook*

The following Erratum has been identified and will be incorporated into the next reprinting of this document.

- Page 61, under Inspection, 3rd, 4th, and 5th paragraphs:

Replace the following:

Class A joints are those joints subjected to high stresses, cyclic stresses, or both, the failure of which could result in significant risk to persons or property or significant operational failure.

Class B joints are those joints subjected to low or moderate stresses, cyclic stresses, or both, the failure of which could result in significant risk to persons or property significant operational failure.

Class C joints are those joints subjected to low or moderate stresses, cyclic stresses, or both, the failure of which could result in significant risk to persons or property, or significant operational failure.

With the following:

Class A is typically chosen for joints subjected to high stresses, cyclic stresses, or both, the failure of which could result in significant risk to persons or property, or in significant operational failure.

Class B is frequently chosen for joints subjected to low or moderate stresses, cyclic stresses, or both, the failure of which could result in significant risk to persons or property, or in significant operational failure.

Class C is frequently chosen for joints subjected to low or moderate stresses, cyclic stresses, or both, the failure of which would have no significant detrimental effect.
