American Welding Society Launches All-New Webinar Series

Miami, FL, May 4th, 2020:

Welding is the foundation of modern life, and our industry and members are essential. To recognize the depth of our Society, AWS is offering an inside look into the standards, certifications, seminars, workforce development and other activities that support the welding community.

We’re pleased to announce that our all-new AWS webinar series starts May 14th. Every other Thursday, we’re serving up enticing content that both members and non-members will find interesting and helpful. These informative sessions start at 2 p.m. EST.

The first discussion topic, “Introduction to AWS,” is a brief history of the American Welding Society and ways we support our community. For over 100 years, AWS has been instrumental in the advancement of the welding industry. This webinar explores how AWS continually reinforces its mission - to keep the world safe.

“All of our departments play a vital role in this Society,” said Cassie Burrell, Senior VP, Strategy & Membership Development. “We’re excited to pull back the curtain and show how they all work together to offer resources for its members and the welding community.”

Additional topics include Best Practices and Insights to Become a Certified Welder, Preparing for a Career as a CWI and more. Attendees will learn what resources AWS has available and how they can use one or more to help advance their careers and earning potential in the industry.
