American Welding Society Introduces 2-Week Online CWI Seminar

Miami, Fl, June 2, 2020: As we begin adjusting to a "new normal," AWS is offering exam prep without the classroom. Available on any internet-connected device, the 2-Week Online CWI Seminar allows for reliable and informative training without the need to travel to a seminar location.

Hosted by an AWS instructor, the 2-Week Online CWI Seminar is designed to prepare students for all three parts of the AWS Certified Welding Inspector (CWI) Exam from the comfort of their own homes. The structure of the online seminar is similar to the traditional in-person CWI seminar but is composed of ten, four-hour interactive online sessions (totaling 40 hours). This new offering is comparable to the 8-Week Online CWI Seminar program, but it takes place over a shortened period, allowing prospective CWIs to take their exam sooner.

"The current climate has prompted a change in the way we accomplish several tasks, and education and training are no different," said Alicia Garcia, Director of Education & Training. "As such, we're proud to offer folks an additional way to get access to the training they need in a format that suits their individual needs and comfort level."

Registered students are provided with everything they need to make the most out of the 2-week online seminar, including a 3-year AWS membership, AWS reference materials, study guides, practice tests and more. Students are also provided a set of inspection tools, which they may keep, and plastic weld replicas that will need to be returned to AWS.

Additionally, for a limited time, anyone registering to take the 2-Week Online CWI Seminar + CWI Pre-Seminar + Exam package in June or July will receive $250 off registration. For more information, visit aws.org/2week

###

About AWS: The American Welding Society (AWS) is a multifaceted, nonprofit organization with a mission to advance the science, technology, and application of welding and allied joining and cutting processes worldwide, including brazing, soldering, and thermal spraying. Headquartered in Miami, Florida, and led by a volunteer organization of officers and directors, AWS serves 70,000 members worldwide and is composed of 22 Districts with 250 Sections and Student Chapters. For more information, visit the 'Society's website at http://www.aws.org.
